

### Encuentros de Geometría Computacional Puzzle

Fold this puzzle, along the grid lines, down to a 1 × 3 rectangle that spells **E-G-C** on both sides, *in the same color on both sides*. There are three puzzles, shown to the right: (1) red on both sides, (2) green on both sides, and (3) blue on both sides.

No cutting (except at slits marked with bold lines). You may fold only along the grid lines. No diagonal folds.

We recommend precreasing the puzzle along all grid lines before starting.

Good luck!

*in honor of  
Ferran Hurtado's 60th birthday
